Back-End: Node, Express, Ruby, Ruby on Rails, MongoDB, Postgres, MySQL

Professional: Remote Pair-Programming, Teamwork, Mentoring, Time Management

Tools & Methods: Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, Chrome Dev Tools

EXPERIENCE

[Attractive Safaris](#) | Kigali

Freelancer & Consultant

March 2023 – November 2023

As a freelancer, my work consists of the following tasks:

- Analyzed the existing website thoroughly for improvements and performed a comparative analysis of competitor websites to identify best practices and areas for enhancement, leading to strategic improvements.
- Optimizing content and media to improve load times and overall user engagement, resulting in increased website traffic and lower bounce rates

TRAINING

[The Gym Rwanda](#) | Kigali

Full-Stack Developer Trainee

July 2023 – February 2024

As a full-stack developer Trainee, my work consisted of the following tasks:

- Ability to recognize interdependency tasks in bigger projects
- Speaking to more experienced developers in person and discovering their approaches
- Understand the end goals and the desired result by learning how to contribute to bigger projects.

[Monishare](#) — A full-stack web application that allows its users to rent moni-cars.

- Built with: (NestJs, Postgres, React, and Tailwind CSS)
- Testing credentials: (username: Armani, password: Armani-PW)

Microverse | Remote

Full-Stack Web Development Trainee & Mentor

February 2022 – February 2023

- Mastered intermediate and advanced topics in full-stack development (including JavaScript, React, Rails, Git, and DS&A challenges) while building multiple full-stack projects independently and via pair programming.
- Translating the design team's UX wireframes and mockups into responsive and interactive features using HTML/CSS and JavaScript.
- Documenting, debugging, and testing application features using the Jest framework.

[Jobster](#) — A full-stack web application that allows its users to manage their job applications.

- Built with: (Node, Express, MongoDB, React, Redux, and Styled-components)

[Comfy Sloth](#) — A full-stack web application allowing users to buy the best furniture for their homes.

- Built with: (Node, Express, MongoDB, React, Redux, AUTH0, Stripe)

EDUCATION

University Of Rwanda | Kigali
